PIZZA PLACE SALES ANALYSIS REPORT

1. INTRODUCTION

This report presents an in-depth analysis of pizza sales data from January 2015 to December 2015 to identify sales trends, customer preferences, and potential areas for improvement. The primary goal is to understand the **decline in sales** and recommend **data-driven strategies** to boost revenue, optimize the menu, and enhance customer satisfaction.

2. PROBLEMS & BACKGROUND

Problem Statement

The pizza restaurant has been experiencing **a steady decline in sales**. Management aims to analyze customer behavior, purchase trends, and product performance to uncover the root causes and **implement targeted solutions** to increase revenue.

Background

The dataset consists of **pizza sales data collected from multiple outlets across the United States**. The analysis focuses on key aspects such as order volume, customer trends, pizza preferences, peak sales hours, and seasonal variations to make **strategic improvements**.

STRATEGIC VS. TACTICAL FOCUS

This is a **strategic initiative** aimed at improving overall business performance by:

- Understanding customer behavior patterns
- Identifying top-selling and low-performing products
- Implementing targeted marketing and pricing strategies

Enhancing operational efficiency

This is a **large-scale project**, impacting multiple areas, including **sales, marketing, operations, and customer experience**.

3. GOALS & KEY PERFORMANCE INDICATORS (KPI's)

Goals

Increase pizza sales by 10% within 6 months.

Identify and address the root cause of the decline in sales.

Improve customer satisfaction and loyalty.

Gain deeper insights into customer behavior and preferences.

KPIs (Key Performance Indicators)

Total Revenue: $817,860.05

Total Pizzas Sold: 49,574

Total Orders: 21,350

Avg Order Value: $38.31

Avg Pizzas per Order: 2.32

4. SOLUTION APPROACH

Data Analysis

✓ Conducted **in-depth sales analysis** to identify order patterns, top-selling products, and revenue trends.

✓ Leveraged **Excel (Pivot Tables, VLOOKUP, Filters, Graphs)** for data cleaning, merging, and visualization.

✓ Analyzed **seasonal trends, peak order timings, and category preferences**.

Data-Driven Insights

Peak Sales Hours: 12 PM - 1 PM and 4 PM - 7 PM are the busiest periods.

Top-Selling Pizza Categories: Classic pizzas contribute the most to total sales.

Size Preferences: L pizzas have the highest demand (45.89%), while small and medium sizes have lower sales.

Seasonality Impact: Sales peak during Spring and Summer, while Fall has the lowest sales.

Stakeholder Engagement

Restaurant Management: Business strategy adjustments based on insights.

Marketing Team: Develop targeted promotions and pricing strategies.

Operations Team: Optimize inventory, staffing, and menu selection.

Customers: Gather feedback through reviews and surveys to improve satisfaction.

5. PROJECT SCOPE & TIMELINE

Step-by-Step Plan

🗓 **Week 1-2:** Data Collection & Cleaning (Remove duplicates, format data, merge datasets).

🗓️ **Week 3-4:** Exploratory Data Analysis (Identify trends, bestsellers, seasonality impact).

🗓️ **Week 5-6:** Marketing & Pricing Strategy (Competitor analysis, promotions, discount planning).

🗓️ **Week 7-8:** Implementation & Monitoring (Track progress via dashboards, adjust strategies).

5Ps Business Strategy

Product: Remove low-selling pizzas, introduce seasonal flavors.

Price: Implement dynamic pricing, offer bundle deals, introduce weekday discounts.

Promotion: Leverage social media, email marketing, and loyalty programs.

Place: Optimize delivery, online ordering, and potential grocery store partnerships.

People: Train staff for enhanced customer experience, improve customer service.

6. METHODOLOGY

Data Sources

Excel dataset from the pizza shop

Customer feedback & reviews

Sales data from multiple outlets **Data**

Processing Steps

Data Wrangling: Removing duplicates, handling missing values.

Data Understanding: Identifying customer purchase behavior and trends.

Data Cleaning: Using Excel functions for structured data.

Data Merging & Joining: Combining multiple tables for in-depth analysis.

Data Analysis:

- Revenue & sales trend analysis
- Best-selling and low-performing pizza identification
- Seasonal sales performance review

Data Visualization:

- Created an **interactive dashboard** with revenue, sales trends, and customer insights.

7. RECOMMENDED STRATEGIES

1. Sales & Customer Trends Optimization

Findings: Average 60 customers per day, peak hours **from 12-1 PM & 5-6 PM**.

Action: Optimize staffing and inventory based on peak demand.

2. Menu Optimization

Findings: Brie Care Pizza has the lowest sales; **XXL pizzas are in high demand**.

Action: Remove underperforming items, introduce limited-edition seasonal pizzas.

3. Revenue Growth Strategy

Findings: Spring & Summer generate the highest sales.

Action: Offer **seasonal discounts in Fall** to boost sales.

4. Marketing & Promotions

Findings: Social media promotions have high engagement but need better conversion.

Action:

- Improve **targeted ads & email marketing** campaigns.
- Offer **combo deals & loyalty programs**.
- Run **weekday discounts to increase midweek sales**.

5. Pricing Optimization

Findings: Average Order Value is $38.31.

Action: Implement **dynamic pricing based on demand and competitor analysis**.

8. BUSINESS CONCEPTS USED

Market Understanding: Identified key customer purchase behaviors.

Customer Demographics: Analyzed order behavior based on season, time, and product preference.

Customer Retention & Acquisition: Launched loyalty programs and promotions.

9. CONCLUSION

The **Pizza Place Sales Analysis Dashboard** provides **critical business insights** into sales performance, customer behavior, and growth opportunities. By implementing **data-driven strategies**, the restaurant can:

✓ **Increase revenue and profitability.**

✓ **Improve customer engagement and retention.**

✓ **Optimize pricing, product offerings, and operational efficiency.**
